 - (4) The number of curb cuts may be adjusted for parcels with greater than 100 feet of lot width through Administrative Waiver in accordance with Section 1.5.3.
- d. Curb cuts shall be constructed in accordance with the city standard detail manual.
- e. Curb cuts must be located to minimize conflict with pedestrian, cyclist, and vehicular traffic on the abutting public right-of-way. Where applicable, curb cuts should be placed to maximize the number of on-street parking spaces.
- f. Shared driveways between abutting properties are encouraged provided that an access easement exists between all property owners.

5.9.2 Design and Construction of Off-Street Vehicle Parking Areas

- a. Americans with Disabilities Act (ADA). The design and construction of all off-street parking areas shall be in in conformity with the Americans with Disabilities Act (ADA).
- b. Parking Area Layout.
 - i. An alley adjacent to the lot may be used to meet the requirement for drive aisle width.
 - ii. Layout Requirements
 - (1) All parking lots and parking structures must be designed so that vehicles enter or leave a parking space without having to move any other vehicle. Parking lots and structures where vehicles are moved by employees of the facility are exempt from this requirement.
 - (2) Parking lots and parking structures must be designed so that the driver of the vehicle proceeds forward into traffic rather than backs out into traffic.
 - (3) Parking lots and parking structures must be designed so that a vehicle is not forced to back onto the public right-of-way to gain access from one parking aisle to another parking aisle.
 - (4) Any parking row that does not provide two means of vehicular egress must provide, at the closed end, a space designated as a turn-around area. This space must be located at the end of a parking row, be designed with a minimum

dimension of nine feet in width by nine feet in depth and include a “No Parking” sign. Parking lots of less than 50 spaces are exempt from this provision.

(5) Vehicle circulation providing cross-access between abutting lots is encouraged.

- c. Delineation of Off-Street Parking Areas. All off-street parking areas with 4 or more spaces, excluding driveways, shall be:
 - i. Identified by painted lines (minimum 4 inches in width), raised curbs, or other means to indicated individual spaces; and,
 - ii. Provided with a wheel stops, bumper guards, raised curbing or other alternatives, which are properly anchored and secured, to prevent vehicles from damaging or encroaching upon any sidewalk, landscape, fence, wall, or structure.
 - iii. Motor vehicles shall not overhang a sidewalk or pedestrian aisle to less than five feet (5') in width. When determining possible encroachment into the sidewalk or pedestrian aisle, a minimum overhang of two (2) horizontal feet shall be provided.
- d. Surface of Off-Street Parking Areas.
 - i. Off-street parking areas and any driveway, interior access driveway, or interior access drive to and from such off-street parking areas shall be hard surfaced with asphalt, concrete, pervious pavement, pavers, or other material to provide a durable, dust-free surface.
 - ii. A temporary or seasonal use permitted by the district in which such temporary or seasonal use is located may use an unimproved or gravel surface for the duration of the temporary or seasonal use. If a temporary gravel surface is provided, such gravel shall be removed, and the off-street parking area shall be returned to its prior condition immediately upon cessation of the temporary or seasonal use.
 - iii. Additional parking surfaces may be permitted through an Administrative Waiver in accordance with Section 1.5.3.
